While our magazine normally discusses projects by using general product terms, we wanted to create a series that would allow readers to learn more about individual products. To create these product guides, we have turned to insulation manufacturers and distributors who know the products best.

This month, we asked companies to submit their most popular, commonly requested products for commercial use.* Next month, we will look at insulation products for the industrial market. We hope these guides make your research easier and help you on your next project.

If you have missed one of our recent reader guides, they are posted online at www.insulation.org/io/columns.

*Disclaimer: NIA is an insulation trade association and does not test or endorse products or companies. The information included in this section is based on submissions from NIA member companies and NIA cannot verify their accuracy. This section includes both free listings, and enhanced listings paid for by the manufacturers. These listings are provided for educational purposes. Readers should always verify that any products they are considering meet the unique needs of their systems and that the claims stated by the manufacturers are accurate.

INDEX OF COMPANIES and PRODUCTS

- Armacell: ArmaFlex®
- Avery Dennison Performance Tapes: Fasson® 0808HP Mechanical Insulation Tape
- Buckaroos, Inc.: Roundup Plus™ Saddles and PVC Clean™ Saddles
- CertainTeed Insulation: ToughGard® R Duct Liner
- Dragon Jacket Insulation: Insulated Pipe Saddle
- Extol Ohio, Inc.: Extol of Ohio Pre-Fabricated Head Insulation
- FastEST, Inc.: Takeoff and Estimating Software
- FBM-SPI: Absorption Plus® Acoustic Panels
- H.B. Fuller Construction Products Inc.: Childers® VI-CRYL® CP-10/CP-11 Weather Barrier Coatings
- ITW Insulation Systems: TRYMER® 25-50 PIR
- Johns Manville: XSPECT® Isofoam APF Board
- Knauf Insulation: Earthwool 1000™ Pipe Insulation
- MIDWEST Fasteners, Inc.: SureShot® Pin Welding System
- NOSWEAT Valve Wraps, LLC: NOSWEAT Valve Wraps
- Owens Corning FOAMGLAS® Insulation: FOAMGLAS® Insulation
- Polyguard Products: Polyphen® Phenolic Insulation
- Vimasco Corp.: WC-7 Ultra Finish White
**Product Name:** ArmaFlex®

**Type of Insulation Material:** Elastomeric foam

**Recommended Application:** HVAC, plumbing, and refrigeration

**Description:** ArmaFlex®, the original closed-cell foam insulation, is the durable, long-lasting insulation solution for high-performance HVAC, plumbing, and refrigeration systems.

**Company Name:** Armacell

---

**Product Name:** Fasson® 0808HP Mechanical Insulation Tape

**Type of Insulation Material:** Pressure-sensitive tape

**Recommended Application:** HVAC and mechanical insulation

**Description:** Fasson® 0808HP is designed for taping joints and seams against moisture, vapor foil jacketing facing, and FSK blankets. Its foil facestock is married to the popular COLD TOUGH™ acrylic adhesive.

**Company Name:** Avery Dennison Performance Tapes

---

**Product Name:** Roundup Plus™ Saddles

**Description:** The Roundup Plus™ Saddle is the premier G90 galvanized protection shield for insulated piping. A unique strip of self-sealing adhesive helps secure its position against the insulation jacket. Additionally, rounded corners limit potential for damage to the vapor barrier and added safety for the installer. Roundup Plus™ Saddles can be found in some of the highest profile hospitals, airports, and institutions in the world.

**Company Name:** Buckaroos, Inc.

**Product Name:** PVC Clean™ Saddles

**Description:** In partnership with Proto Corporation, the leading supplier of PVC jacketing products, Buckaroos recently introduced the PVC Clean™ Saddles that come in 14 different colors. In addition to the aesthetic options, these saddles have been in high demand for clean room environments in lieu of pricing stainless steel saddles.

**Company Name:** Buckaroos, Inc.

---

**Product Name:** ToughGard® R Duct Liner

**Type of Insulation Material:** Fiber glass

**Recommended Application:** HVAC duct liner applications

**Description:** ToughGard® R rotary duct liner absorbs unwanted crosstalk and equipment noises while helping to lower HVAC operating costs by reducing heat gain and loss in duct systems.

**Company Name:** CertainTeed Insulation

---

**Product Name:** Insulated Pipe Saddle

**Type of Insulation Material:** 25 lb. closed cell foam and 2 lb. closed cell foam

**Recommended Application:** HVAC, plumbing, and/or refrigeration

**Description:** The Insulated Pipe Saddles are engineered with a compressive strength of 1200 psi to support and insulate pipe in horizontal and vertical applications, while creating integrated connection points for additional insulation.

**Company Name:** Dragon Jacket Insulation

---

**Product Name:** Extol of Ohio Pre-Fabricated Head Insulation

**Type of Insulation Materials:** Cellular glass, polyisocyanurate, extruded polystyrene

**Recommended Application:** Refrigeration, chillers

**Description:** Precision engineered head insulation segments precisely fit the exact curvature of the vessel ends. 2:1 elliptical ASME, flanged and dished, hemispherical, and conical vessel heads with matching jacket/cladding systems available.

**Company Name:** Extol of Ohio, Inc.
Product Name: Absorption Plus® Acoustic Panels

**Type of Insulation Material:** Custom fabricated acoustical panels

**Recommended Application:** Sound absorption in noisy spaces

**Description:** Absorption Plus® Panels are supplied with a variety of textile finishes for commercial space, mechanical rooms, and manufacturing environments. Available for direct wall, ceiling application, suspended baffles, etc., to absorb unwanted noise.

**Company Name:** FBM-SPI

---

Product Name: Childers® CP-10 / CP-11 Weather Barrier Coatings

**Type of Insulation Material:** Water-based weather barrier coating

**Recommended Application:** Interior and/or exterior protective coating for most types of thermal insulation

**Description:** Childers® VI-CRYL® CP-10 / CP-11 weather barrier coating has been trusted for decades by engineers and insulation contractors to provide mechanical protection and weatherproofing of all types of thermal insulation.

**Company Name:** H.B. Fuller Construction Products Inc.

---

**Description:** FastEST, Inc. has estimating and takeoff software available on their website. They have FastPIPE®, plumbing, and mechanical estimating software for commercial and industrial contractors; FastDUCT®, a commercial HVAC estimate software that simplifies bidding sheet metal and industrial ductwork jobs; and FastWRAP®, a mechanical insulation estimating software for commercial contractors.

**Company Name:** FastEST, Inc.

**Website:** https://fastest-inc.com

---

**Product Name:** Estimating and Takeoff Software

**Description:** FastEST, Inc. offers a suite of software tools, including FastPIPE®, FastDUCT®, and FastWRAP™, designed to simplify the estimating and takeoff process for plumbing, HVAC, and mechanical insulation professionals. Their software caters to various industries and applications, providing efficient solutions for commercial and industrial projects.

**Company Name:** FastEST, Inc.

**Website:** https://fastest-inc.com
### Knauf Insulation

**Company Name:** Knauf Insulation  
**Type of Insulation Material:** Fiber glass  
**Recommended Application:** Earthwool 1000° Pipe Insulation is used to insulate iron and copper piping in industrial applications and in commercial and institutional buildings.  
**Description:** Knauf Insulation Earthwool 1000° pipe insulation is a molded, one-piece insulation made from inorganic fiber glass bonded with ECOSE Technology. It is produced in 3’ lengths with or without a factory-applied jacket. ASJ+ is an all-service jacket composed of aluminum foil, reinforced with a glass scrim bonded to a kraft paper interleaving with an outer film layer, leaving no paper exposed. The jacket is white, and the longitudinal lap of the jacket has a self-sealing adhesive. The SSL+ Advanced Closure System creates a strong and lasting bond.  
**ECOSE Technology** is a revolutionary binder chemistry that enhances the sustainability of our products. The “binder” is the bond that holds our fiber glass product together and gives the product its shape and brown color. ECOSE Technology is a plant-based, sustainable chemistry that replaces the phenol/formaldehyde (PF) binder traditionally used in fiber glass products. Products using ECOSE Technology are formaldehyde-free and have reduced global warming potential.  
**Offers excellent resistance to heat loss or gain,** which saves energy and lowers operating costs.  
**ASJ+ faced pipe insulation has a self-sealing lap,** which eliminates the need for staples, additional material, and tools.

| Temperature Range and Physical Property: | Earthwool 1000° Pipe Insulation is suitable for hot, cold, concealed, and exposed piping systems operating at temperatures from 0°F–1000°F (-18°C to 538°C). |

---

### TRYMER® 25-50 PIR

**Product Name:** TRYMER® 25-50 PIR  
**Type of Insulation Material:** Polyisocyanurate  
**Recommended Application:** Chilled water application  
**Description:** TRYMER® 25-50 PIR is ideal for use as pipe insulation in commercial buildings. It is the only PIR made in the United States that meets ASTM E84 <25/50 flame/smoke for plenums.  
**Company Name:** ITW Insulation Systems

---

### XSPECT® ISOfoam APF Board

**Product Name:** XSPECT® ISOfoam APF Board  
**Type of Insulation Material:** Polyisocyanurate foam  
**Recommended Application:** Highly versatile insulation that can be used in a variety of mechanical and OEM applications, including rooftop ducts, appliances, HVAC equipment, refrigerated transportation, storage vessels, and railcars.  
**Description:** XSPECT® ISOfoam APF Board is a closed-cell polyisocyanurate foam core bonded to a foil facer on both sides and offers one of the highest R-values of any rigid insulation available.  
**Company Name:** Johns Manville

---

---

**Product Name:** NOSWEAT Valve Wraps

**Type of Insulation Material:** TyChem QC (Tyvek) and fiber glass

**Recommended Application:** Ball valves, strainers, circuit setters, balancing valves, flow meters, or anywhere a removable cover is needed

**Description:** I started my insulation career in 1973 and all I was ever told was, “this is the way we do it.” Well, I’m not cut from that mold so I tried to do everything different. NOSWEAT Valve Wraps aren’t cut from a mold either, they’re different. Each wrap is handmade and personally inspected to ensure quality. NOSWEAT Valve Wraps are made for indoor, commercial use on hot and cold pipes. Saves energy on hot and eliminates condensation on cold. The NOSWEAT Valve Wrap’s soft, flexible construction allows it to be “fished” between 2 tight pieces of pipe insulation to completely insulate any valve, handle and all.

The handle of any other extension is where the condensation starts. The NOSWEAT Valve Wrap saves labor by almost installing itself. No more “oversizing,” then applying caulk or mastic to seal the nonremovable cover, only to have them cut off and insulated again. Every mechanical insulator has had this happen. The NOSWEAT Valve Wrap works. When installed correctly with the proper inserts, the NOSWEAT Valve Wrap provides a neat, clean, bright white finished product that can be removed for maintenance, then reinstalled with no damage to the insert or outer jacket. Just ask anyone who has used a NOSWEAT Valve Wrap about the ease of installation or the versatility of our custom NOSWEAT products. Our many repeat customers are a testament to our great products.

**Company Name:** NOSWEAT Valve Wraps, LLC

**Website:** www.valvewraps.com

---

**Product Name:** SureShot® Pin Welding System

**Type of Insulation Material:** Used on duct board and many types of insulation flatwork.

**Recommended Application:** HVAC duct and insulated metals

**Description:** Portable, ultra-light, pin welding system. Dual power: 110 volt or 220 volt. Welds duct pins, insulation nails, and more. For use on galvanized steel, stainless, and aluminum. Three-year warranty included.

**Company Name:** MIDWEST Fasteners, Inc.
**Product Name:** FOAMGLAS® insulation

**Type of Insulation Material:** Cellular glass

**Recommended Application:** Chilled water, district energy systems

**Description:** FOAMGLAS® insulation is a high-performance, long-lasting solution for chilled water and district energy systems. Impermeable to water and water vapor. Provides constant thermal efficiency throughout the life of the system, greatly reducing long-term energy consumption.

**Company Name:** Owens Corning FOAMGLAS® Insulation

---

**Product Name:** Polyphen® Phenolic Insulation

**Type of Insulation Material:** Phenolic insulation

**Recommended Application:** Chilled water piping

**Description:** Polyguard Polyphen® Phenolic Insulation offers engineers the optimal choice for chilled water pipe insulation: the highest thermal efficiency and the best fire performance of any foam insulation.

**Company Name:** Polyguard Products

---

**Product Name:** WC-7 Ultra Finish White

**Type of Insulation Material:** Fiber glass, elastomeric, calcium silicate

**Recommended Application:** HVAC and insulation duct work

**Description:** WC-7 Ultra Finish vinyl-acrylic, general-purpose mastic that has been formulated to match many of the newer types of facings now being used by insulation manufacturers.

**Company Name:** Vimasco Corporation
