

NIA Education Center — TIAC Application

Premier Training Subscription | Subscription access: September 1, 2026 to December 31, 2027

This application allows TIAC members (contractors, distributors, laminators, or fabricators) to purchase NIA's Premier Training Subscription to NIA's Education Center, as long as the TIAC member company does not conduct business in the United States and is not currently eligible for NIA membership. Canadian companies that do business in the United States shall only be eligible to become Premier Training Subscribers through their NIA membership. Learn more by visiting <https://insulation.org/membership/join-the-national-insulation-association-nia/> or calling NIA at 703-464-6422.

Only companies purchasing subscriptions may have access to and use the NIA Education Center courses. Access may not be provided to member companies who are not subscribers, to those companies that have discontinued their subscription, or at industry or association training/events.

1. Once a TIAC member company purchases a subscription, every payroll employee receives unlimited access to the courses using their unique company email address.
2. There are no limitations to the number of times a subscriber can take a course. Each employee has access to more than 100 current courses and all new courses added in 2026 and 2027.
3. Company employees will access the site through a username and password. Once the login is created by the user, they can track the progress of their courses, completion certificates, etc. in their profile.
4. All subscriptions are for a calendar year regardless of when a company subscribes. An exception to this is included in the first-year special offer created for TIAC, where access is from September 1, 2026 to December 31, 2027.

Subscription access will run from September 1, 2026, to December 31, 2027, and will be available to anyone within the subscriber's company. To subscribe, the primary representative, designated below, should sign up for this service by selecting the rate below that represents the corresponding company revenue value and subscription fee. This number should represent the company's annual revenue in insulation sales.
